

**When you are rushed into Emergency
at St. Paul's Hospital
we want you to have the best.**

St. Paul's Hospital

St. Paul's Hospital Emergency Room visits exceed 45,000 annually. 16 new monitors with updated technology are needed to provide the best care for the increasing number of patients in critical beds.

"Our goal at St. Paul's Hospital is to ensure all ER beds are equipped with state-of-the-art cardiac monitors interconnected from a central display. This would enable continual observation of several patients and allowing for prompt identification and initiation of treatment."

John Larmet, Nurse Manager, SPH Emergency Dept.
